Projects

- **Netflix Clone**
In this project, we developed a clone of Netflix which works as same as Netflix, here we basically more focused on the designing of the landing page and other pages. Technologies like HTML, CSS, JS, PHP, SQL are used in this project.

- **Educational Web Application (Self-Project)**
This is the **live** project in which a web application is developed through which some informative educational content is provided to the users. It provides notes for different courses and colleges. This project is in running state and will be completed as soon as possible.
